

SERVICES 360

PRO

Proactive repair and vehicle maintenance coverage

Our Services 360 Pro package aims to completely eliminate productivity affecting risks from your fleet operations through a fully outsourced approach. To ensure your productivity our Pro offering takes your coverage into the future, quite literally. With this package you get a proactive repair and maintenance approach to every vehicle under contract leveraging advanced AI-powered analysis of data from nearly a million connected vehicles. This allows us to accurately predict probable future failure points for each individual vehicle based on both current and past operational data. And then ensure that critical core components of the powertrain are replaced before any issues arise.

Quite simply, if you want complete peace of mind and need to maintain 100% focus on the business and logistics side of your operation – the Services 360 Pro package is for you.

LET US SOLVE YOUR VEHICLE PROBLEMS BEFORE THEY OCCUR

While our ProCare service is the defining part of Services 360 Pro, of course the services package as a whole provides a much more comprehensive cover for your contracted vehicles. All our packages come with digital insights and fleet management tools as a constant foundation. Flexible Maintenance is also always included to ensure each individual vehicle is perfectly serviced according to its specific operating conditions and history, leaving you with vehicles that are neither under nor overserviced – with minimised downtime as a result. You also get both Expanded Powertrain as well as Chassis and Cab Repair services to cover urgent or unexpected needs that may affect your operations.

Fully tailored

Every operation is unique, and that's why we consider our services packages starting points – and offer a selection of optional add-on services for each. And even though all our four packages are available consistently within Europe, there are also further local services that may be offered specifically to certain markets – locally to parts of your operation. All to ensure you have the services support you need wherever you operate. Getting to the right final services set-up for your unique operation and business should always start with a conversation – so just contact us, and we will make sure you get the coverage you need.
